Education

University of Washington

Bachelor of Science, Computer Science, Dean's List

Seattle, WA

Aug 2023 – June 2027

Pierce College Fort Steilacoom

Associate of Science, General Transfer, Dean's List

Lakewood, WA

Sept 2021 – June 2023

Experience

Software Engineering Project | *Perfect Pair Nonprofit, Spark Program*

Aug 2026 – Sept 2026

- Designed and implemented an automated document ingestion pipeline that detects new and modified files from Google Drive and prepares them for downstream retrieval and chatbot systems.
- Built file normalization workflows for Google Docs, Sheets, Slides, and PDFs, converting heterogeneous document formats into a standardized Markdown representation.
- Implemented Cloudflare R2 object storage and D1 metadata persistence for document contents, sync status, timestamps, source metadata, and processing failures.
- Designed a cron-triggered, queue-based architecture that processes documents independently, reducing per-invocation work and operating within Cloudflare Free plan CPU constraints.
- Implemented idempotent synchronization using Drive file IDs, deterministic R2 keys, and D1 database upserts to prevent duplicate records during retries and repeated processing.
- Added failure tracking and error persistence so unsuccessful document syncs could be surfaced, diagnosed, and retried instead of silently dropped.

Student Technician

Oct 2024 – Present

University of Washington

Seattle, WA

- Diagnose and resolve hardware, software, audiovisual, and connectivity issues across production classroom systems used by students and faculty.
- Troubleshoot technical failures under time constraints, minimizing downtime during active classes and university events.
- Maintain and test computers, displays, projectors, audio systems, and supporting classroom infrastructure.
- Collaborate with technicians across campus to coordinate maintenance workflows, equipment logistics, and service requests.
- Assist with onboarding and training new technicians on troubleshooting procedures and technical systems.

Projects

Intimo Y Casual | *TypeScript, Next.js, Firebase, Tailwind CSS*

June 2025 – Present

- Developed and deployed a bilingual e-commerce platform used by real customers, consolidating product browsing, customer accounts, and ordering into a single storefront.
- Implemented Firebase authentication, authorization, and data storage to securely manage users, products, and customer orders.
- Designed and enforced Firebase security rules to protect customer and application data in production.
- Integrated a WhatsApp-based ordering workflow to streamline customer communication and reduce manual order coordination.

GlobeGram | *TypeScript, React Native, NestJS, PostgreSQL, AI*

Jan 2025 – Mar 2025

- Designed and implemented backend services and REST APIs supporting itinerary creation and management for a multi-user travel application.
- Developed AI-powered recommendation logic using user location, budget, and travel plans to generate personalized travel suggestions.
- Integrated Google Maps APIs to provide real-time, location-aware itinerary visualization.
- Automated testing and deployment workflows using GitHub Actions to support reliable and repeatable releases.

Flights | *Java, Azure, SQL Server, PostgreSQL*

Mar 2024 – June 2024

- Designed and implemented backend services supporting flight search, filtering, and database-backed application workflows.
- Optimized database queries and indexing strategies, improving search performance by 40%.
- Applied object-oriented design principles to build a maintainable and extensible backend architecture.

Technical Skills

Languages:	Java, Python, C, C++, TypeScript, JavaScript, SQL
Backend / Systems:	Node.js, NestJS, REST APIs, PostgreSQL, SQL Server, Linux
Frontend:	React, Next.js, React Native, Tailwind CSS
Cloud / DevOps:	Cloudflare Workers, R2, D1, Firebase, Azure, AWS, GitHub Actions, CI/CD
Tools:	Git, Google Drive API, GDB
Coursework:	Data Structures & Algorithms, Systems Programming, Artificial Intelligence, Computer Security, Software Engineering
